**ABSTRACT**

Fall 1985, "end-of-registration" enrollment data were gathered for the 50 Illinois public community colleges and compared with data from earlier years. Highlights of the analysis indicate that: (1) the colleges enrolled 339,782 students in instructional credit courses in fall 1985, representing a 5.9% decrease from fall 1984; (2) the full-time equivalent (FTE) enrollment in fall 1985 was 166,674, a decrease of 9,792 (5.5%) from fall 1984; (3) the proportion of full-time students enrolled in community colleges decreased from 28.5% in fall 1984 to 28.2% in fall 1985; (4) the number of female students decreased from 208,766 in fall 1984 to 196,785 in fall 1985, a decrease of 5.7%; (5) minority student enrollment experienced a decrease in headcount, but maintained its proportion of total student enrollment; (6) the median age of community college students was 26.6 years in 1985 and 27.3 years in 1984; (7) over 50% of the 1985 students had been enrolled in the same college the previous term; (8) enrollments in pre-baccalaureate/transfer, occupational programs, and general studies decreased, while enrollments in vocational skills and remedial/adult/basic/adult secondary program areas increased; and (9) 48.3% of the students attending on a full-time basis were enrolled in pre-baccalaureate transfer programs. ## HIGHLIGHTS OF FALL 1985 OPENING ENROLLMENT REPORT

1. At the "end-of-registration" in the Fall 1985 term, the 50 public community colleges in Illinois enrolled 339,782 students in instructional credit courses, a decrease of 21,404 students (5.9 percent) from the Fall 1984 term (see page 2).
2. The full-time equivalent (FTE) enrollment in the Fall 1985 term was 166,674, a decrease of 9,792 (5.5 percent) from the Fall 1984 term (see page 2).
3. The proportion of full-time students enrolled in community colleges decreased from 28.5 percent in the Fall 1984 term to 28.2 percent in the Fall of 1985. This is the lowest proportion of full-time students in the last five years (see page 2).
4. The number of female students decreased from 208,766 in the Fall of 1984 to 196,785 in the Fall of 1985 (a decrease of 11,981 or 5.7 percent). The number of male students also decreased but at a higher rate (152,420 to 142,970 or 6.2 percent) (see page 4).
5. The analysis of Fall 1985 enrollment by ethnic origin showed that minority student enrollment experienced a decrease in headcount but maintained its proportion of total student enrollment from the Fall 1984 term. The distribution for Fall 1985 was as follows: Asian or Pacific Islander, 3.1 percent; American Indian or Alaskan, 0.4 percent; Black, 17.6 percent; Hispanic, 6.6 percent; White, 72.1 percent; Non-resident Alien, 0.2 percent (see page 4).
6. The analysis of student enrollment by age reveals that the median age of community college students enrolled in the Fall term of 1985 was 26.6. This is a decrease from 27.3 a year ago. While the average age decreased, over half of the students enrolled in community colleges still are older than the traditional college-age student (see page 5).
7. The number of freshmen enrolled in community colleges decreased from 199,361 in the Fall of 1984 to 186,421 (a decrease 6.5 percent) in the Fall of 1985. The number of sophomore students decreased more sharply (a decrease of 11.0 percent) during the same time period (see page 5).
8. Over 50 percent of the students enrolled in the Fall of 1985 had been enrolled at the same college the previous term. The proportion of students enrolled for the first time increased from 31.9 percent in the Fall of 1984 to 33.6 percent in the Fall of 1985 (see page 7).
9. An analysis of enrollment by instructional program area showed that enrollments in pre-baccalaureate/transfer, occupational programs, and general studies decreased in the Fall of 1985. Increases occurred in the vocational skills and remedial/adult basic/adult secondary program areas (see page 8).

HIGHLIGHTS OF FALL 1985 OPENING ENROLLMENT REPORT (continued)

10. Almost half (48.3 percent) of the students attending on a full-time basis are enrolled in pre-baccalaureate/transfer programs (see page 9).
11. The pre-baccalaureate/transfer program area has the largest number of students in each of the racial/ethnic groups with the exception of Hispanics. More Hispanics are enrolled in remedial/adult basic/adult secondary education programs than in other programs of study (see page 11).
12. The average age of students varies by the type of instructional programs. The median age for each program area for Fall 1985 was as follows: pre-baccalaureate/transfer, 23.5; occupational, 26.1; remedial/ABE/ASE, 27.8; vocational skills, 33.9; and general studies, 38.6 (see page 13).

STUDENT ENROLLMENT DATA AND TRENDS IN THE  
PUBLIC COMMUNITY COLLEGES OF ILLINOIS: FALL 1985

INTRODUCTION

Accurate and comprehensive information on community college enrollment is important at the local, state and national levels. This information is used not only to analyze historical enrollment trends but also for planning future programs, curricula, financing, and facility needs. Each college provides the Illinois Community College Board with data on each student enrolled in credit generating courses. These computerized data are used to produce various reports on student characteristics and curricula enrollments in Illinois community colleges. From this centralized statewide student data base, the data needs of both state and national agencies and legislative bodies can be met.

This report focuses on a summary of statewide student enrollment trends and student characteristics in Illinois public community colleges. The analyses are based on Fall 1985 opening enrollments as reported by the colleges at the end of the regular fall registration period (usually the 10th day of the term). These data do not reflect enrollment in courses that begin after the end of the regular registration period. For colleges having two or more modules during a semester, only those students enrolled in the first module are included. Therefore, these enrollments do not include all students who enroll during the fall term. They are, however, comparable counts from year to year and from institution to institution. They are also comparable to fall enrollment data in institutions of higher education throughout the nation.

For comparison with past fall enrollments, summary data for the last five years are presented. In addition to the summary data, a detailed table comparing Fall 1984 and Fall 1985 headcount and FTE enrollments by college is included. Additional enrollment data for each community college will be included in the Fiscal Year 1986 edition of the Data and Characteristics of the Illinois Public Community College System.

The section on instructional programs has been expanded to include an analysis of student characteristics within program areas for 1985. Future reports will contain trend data for these characteristics. The inclusion of these additional data should result in a more comprehensive understanding of those served by the community college system.

## STUDENT ENROLLMENT BY COMMUNITY COLLEGE

Fall opening headcount enrollment for 1985 (Fiscal Year 1986) was 339,782, and full-time equivalent (FTE) students totaled 166,674. Table 1 compares these enrollment data with similar data for the previous four years. A comparison of student headcount enrollment for 1985 with data from a year ago shows a decrease of 5.9 percent or 21,404 students. FTE enrollment decreased 5.5 percent from 176,466 to 166,674.

Table 1

### SUMMARY OF OPENING FALL ENROLLMENTS IN PUBLIC COMMUNITY COLLEGES IN ILLINOIS FROM 1981 TO 1985

|                | <u>1981</u> | <u>1982</u> | <u>1983</u> | <u>1984</u> | <u>1985</u> |
|----------------|-------------|-------------|-------------|-------------|-------------|
| Headcount      | 388,369     | 387,822     | 356,643     | 361,186     | 339,782     |
| Percent Change | 8.2%        | -0.1%       | -8.0%       | 1.3%        | -5.9%       |
| FTE            | 187,609     | 189,245     | 179,165     | 176,466     | 166,674     |
| Percent Change | 8.0%        | 0.9%        | -5.3%       | -1.5%       | -5.5%       |

Table 2 provides a comparison of 1985 Fall opening enrollments with 1984 Fall opening enrollments for each community college. Of the 50 colleges, 18 showed increases, 26 showed decreases, and six showed little or no change (<1.0 percent) in headcount. FTE increases were reported by 16 colleges, decreases by 28 colleges, and little or no change by six colleges. It should be noted that the increases experienced at some of the Chicago City Colleges are due to the absorption of students from the discontinued Chicago Urban Skills Institute.

### SUMMARY OF FULL-TIME/PART-TIME ENROLLMENTS

A comparison of Fall 1985 full-time/part-time enrollments with those for the past four years shows that the proportion of full-time students declined to the lowest point in the five-year period (see Table 3). The proportion dropped from 30.3 percent in 1983 to 28.5 percent in 1984 to 28.2 percent in 1985. The actual number of full-time enrollees decreased by 6.9 percent from the same time a year ago while part-time enrollments experienced a lesser decline of 5.5 percent.

## SUMMARY OF MALE/FEMALE ENROLLMENTS

Table 4 presents a summary of male and female headcount from Fall 1981 through Fall 1985. During this period the ratio of male to female students has remained relatively constant, with a slight increase in the proportion of females occurring over the last four years. A comparison of 1985 with 1984 shows a slightly larger percentage decrease in male headcount (6.2 percent) than in female headcount (5.7 percent).

## SUMMARY OF ETHNIC ORIGIN ENROLLMENTS

A comparison of Fall 1985 with Fall 1984 shows a decline in headcount in all racial/ethnic categories except Hispanic (see Table 5), which increased by only 0.9 percent. This increase, together with the decreases in other categories, resulted in an increase in the proportion of Hispanic students to 6.6 percent of the community college population. While headcount decreases occurred among Asian, American Indian and white students, their proportional representation changes were negligible, with the white student proportion increasing by two-tenths of a percent and Asian and American Indian remaining unchanged. Black and non-resident alien students declined both in headcount

and in proportion of total students from a year ago. Examination of the last five years, however, shows that although the proportion of black students dropped from 18.3 percent in Fall 1984 to 17.6 percent in Fall 1985, the 1985 percentage is still higher than any of the other previous years. The number and proportion of non-resident alien students has been decreasing steadily since Fall 1981.

#### SUMMARY OF ENROLLMENTS BY AGE CATEGORY

The proportion and number of students under the age of 21 increased in Fall 1985 for the first time since Fall 1982 (see Table 6). The number of students in all other age categories decreased compared to a year ago. Proportionately, these age categories also declined except for the 31 through 39 age group which maintained its share of the total student population. Thus, as can be expected from these observations, the average age as measured by the median and mean age of the students declined from a median age of 27.3 and a mean age of 32.4 in 1984 to 26.6 and 30.8, respectively, in 1985.

#### SUMMARY OF ENROLLMENTS BY STUDENT LEVEL

Table 7 summarizes enrollments by student level or classification for the past five years. Freshmen comprised 54.9 percent of all community college enrollments in Fall 1985. This percentage is slightly lower than last year, continuing the trend of the last four years. The number of sophomores, which had increased in 1983 and held steady in 1984, decreased by 11.0 percent in 1985. The number of high school students enrolled in community colleges continued to drop although their proportion of the total enrollment remained steady. While the number of unclassified students decreased in Fall 1985, their proportion continued to increase. Unclassified students comprise 27 percent of the community college enrollment. (Unclassified students are defined as students who do not meet minimum requirements for entrance as regular college-level students, including students who are enrolled in adult basic or adult secondary education. Students who already have a Bachelor's Degree or Associate Degree but who are taking courses at the same or lower level also are considered as unclassified.) Large increases in adult and remedial education enrollments are reflected in the increase in unclassified students.

#### SUMMARY OF ENROLLMENTS BY-ENROLLMENT STATUS

Community college students are assigned to one of four enrollment status categories. First-time students are entering students who have not previously attended any college. In addition to first-time fall students, students who are enrolled in the fall term attending college for the first time during the previous summer are included in this classification. Transfer students are those persons entering the college for the first time with academic credit earned at another college or university. Continuing students were enrolled at the college the previous term, and re-admitted students are those who were enrolled at the college previously but not enrolled the previous term (excluding summer). Table 8 presents a summary of the fall student enrollment status from 1981 to 1985. The proportion of students in each of these categories has fluctuated over the five-year period. Since the Fall term of 1982, the largest proportion of enrollment is comprised of continuing students. The proportion of first-time students has been increasing since 1983. All four categories experienced headcount decreases in 1985; however, the number of first-time students decreased by less than one percent compared to a decrease of almost ten percent for continuing students.

Table 8

## COMPARISON OF OPENING FALL HEADCOUNT ENROLLMENTS IN PUBLIC COMMUNITY COLLEGES IN ILLINOIS FROM 1981 to 1985 BY ENROLLMENT STATUS

|                | 1981            | 1982            | 1983            | 1984            | 1985            |

## SUMMARY OF ENROLLMENTS IN INSTRUCTIONAL PROGRAMS

A summary of total student headcount enrollments by instructional program areas from Fall 1981 through Fall 1985 is provided in Table 9. Pre-baccalaureate/transfer and occupational students taking courses but not pursuing a degree are shown as course enrollees and are included in the total program counts. Pre-baccalaureate/transfer, occupational, and general studies program areas each experienced headcount declines in Fall 1985. However, the proportion of students in the pre-baccalaureate/transfer and occupational program areas increased to 36.1 and 32.0 percent from 35.8 and 31.1 percent, respectively. Vocational skills and remedial/ABE/ASE areas experienced increases in both headcount and proportion of students in Fall 1985 as they had in Fall 1984. A sharp decrease occurred in the general studies area. It should be noted that the proportion of students in the unknown instructional area decreased through the five-year period, making the proportional changes in the other areas somewhat difficult to interpret.

Enrollments in Instructional Programs by Full-time/Part-time Status. Table 10 illustrates the distribution of full-time/part-time attendance of students in different instructional programs in Fall 1985. Overall, 28.2 percent of community college students attend on a full-time basis (12 or more credit hours). A comparison of enrollment status among the instructional program areas reveals that the highest percentage (37.6 percent) of full-time students occurs in the pre-baccalaureate/transfer area. Thirty-two percent of the occupational students are full-time enrollees. Vocational skills and general studies students are enrolled primarily on a part-time basis--95.4 and 94.1 percent, respectively.

Table 10

Enrollments in Instructional Programs by Male/Female. Examination of male/female distribution in the instructional program areas shows the distribution within the pre-baccalaureate/transfer area (42 percent male, 58 percent female) to be similar to the overall student population distribution (see Table 11). In each of the instructional areas, females outnumber males. The highest proportion of males (48.3 percent) occurs in the remedial/adult basic/adult secondary education area. The highest proportion of females (67.3 percent) occurs in the general studies area.

| <b>TOTAL</b>      | 142,970 (42.1%)<br>100.0% | 196,812 (57.9%)<br>100.0% | 339,782 (100.0%)<br>100.0% |

Enrollments in Instructional Programs by Racial/Ethnic Origin. Examination of each racial/ethnic category's representation across program areas shows that the largest percentage of each racial/ethnic group, except Hispanics, is found in pre-baccalaureate/transfer programs. The largest number of Hispanics, 12,041 or 56.7 percent, occurs in remedial/ABE/ASE programs, which includes English as a Second Language instruction.

A comparison of the racial/ethnic distribution within the pre-baccalaureate/transfer program area with the racial/ethnic distribution for all community college students shows that a larger proportion of pre-baccalaureate/transfer students (73.3 percent) are white compared to 68.8 percent white in the overall student population (see Table 12). The proportion of transfer students who are black and Hispanic is lower than the overall student distribution--15.5 and 3.1 percent compared to 16.8 and 6.3 percent, respectively. The remaining racial/ethnic distribution in the transfer area is similar to the overall distribution. Within the occupational program area, white students represent 77.4 percent of the enrollment. The

representation of Asians, Blacks, and Hispanics in the occupational area is lower than their total student representation and their representation in pre-baccalaureate/transfer programs. The racial/ethnic distribution in the remedial/ABE/ASE program area shows a predominance of minority students. Asians represent 6.5 percent, Blacks 32.6 percent, and Hispanics 28.3 percent of the remedial/ABE/ASE students compared to a white student enrollment of only 30.6 percent.

Enrollment in Instructional Programs by Age. Within the total community college population, 42.8 percent of the students are less than 25 years of age. Table 13 shows that within the various program areas the percentage of students under the age of 25 is as follows: pre-baccalaureate/transfer--53.9 percent, occupational--44.6 percent, vocational skills--21.4 percent, remedial/ABE/ASE--39.6 percent, and general studies--20.1 percent. Almost 45 percent of the students in general studies are over 40 years old.

Examination of each age group's representation across program areas shows that 50 percent of all students age 17 through 20 and 39.4 percent of all 21 through 24 year old students are enrolled in pre-baccalaureate/transfer programs. The highest percentages of students in the age groups 25-30, 31-39, and 40-50 (36.1 percent, 36.2 percent, and 30.3 percent, respectively) occur in the occupational program area. Over 55 percent of all students over the age of 55 are enrolled in general studies courses. While the largest proportion of students less than 17 years old are enrolled in the pre-baccalaureate/transfer program area (26.6 percent), another 26.3 percent are in remedial/ABE/ASE programs.

Enrollments in Instructional Programs by CIP. The Fall Curriculum Enrollment Report presented in the appendix provides a listing of enrollments by Classification of Instructional Programs (CIP) codes for Fall 1985. Of the 122,835 pre-baccalaureate/transfer (1.1) students, 21,917 are students taking transfer courses but not pursuing a degree (course enrollees CIP 24.0104). Most colleges are no longer offering major specific degrees but are offering general Associate in Arts (CIP 24.0101) and Associate in Science (CIP 30.0101) degrees. This accounts for the relatively small number of enrollees reported in specific transfer degree categories.

Of the 108,752 occupational (1.2) students, 13,319 were taking occupational courses but were not pursuing a degree or certificate. Business data programming (CIP 07.0305) continued to have the largest number of program enrollees with 12,998. However, this was a decrease of 4,161 (24.2 percent) from a year ago. The second largest curriculum was associate degree nursing (CIP 18.1101) with 6,339 students--a decrease of 1,902 (23.1 percent) from a year ago. Other curricula with enrollments over 3,000 were accounting and bookkeeping (CIP 07.0101) with 6,171, business administration and management (CIP 06.0401) with 4,877, secretarial (CIP 07.0606) with 4,294, electronic technology (CIP 15.0303) with 3,516, criminal justice administration (CIP 43.0105) with 3,535, and child care aide (CIP 20.0202) with 3,282 students. In each of these curricula, except criminal justice, enrollments were higher than they had been in the Fall of 1984.
